

Improve Business Continuity and Turn-up Time with Supplemental Access

Simple wireless data back-up and temporary broadband access to help you minimize downtime and expedite install times

Benefits:

Enable the quick establishment of new locations

Seamlessly add new business applications and services

Supplement your current network for reliable connectivity

Features:

Temporary pre-installation for Sprint-provided Ethernet Access

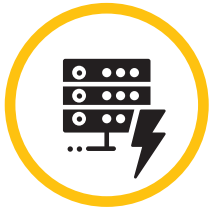

Back-up for any provider's Ethernet or Broadband Access at low cost

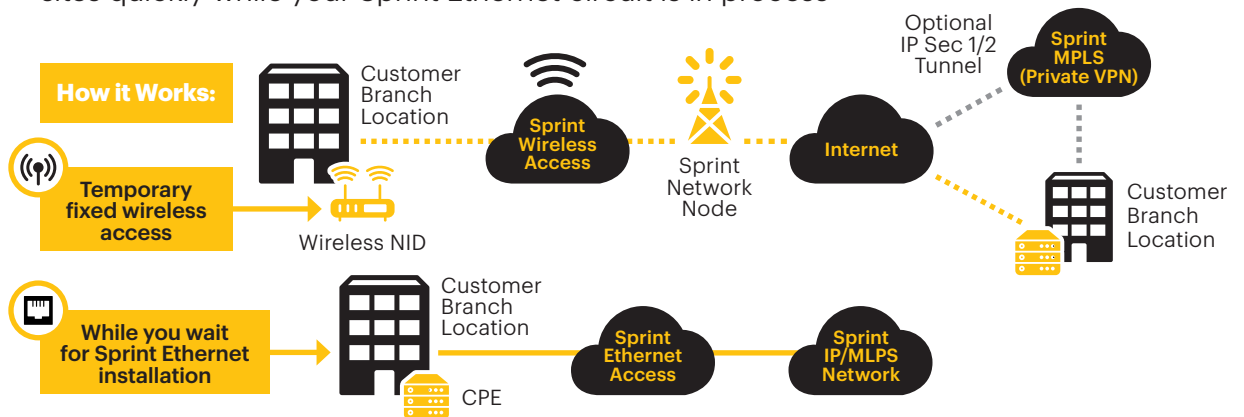

Nationwide availability via Sprint's U.S. LTE Network

Sprint offers two unique supplemental access options to meet your connectivity needs:

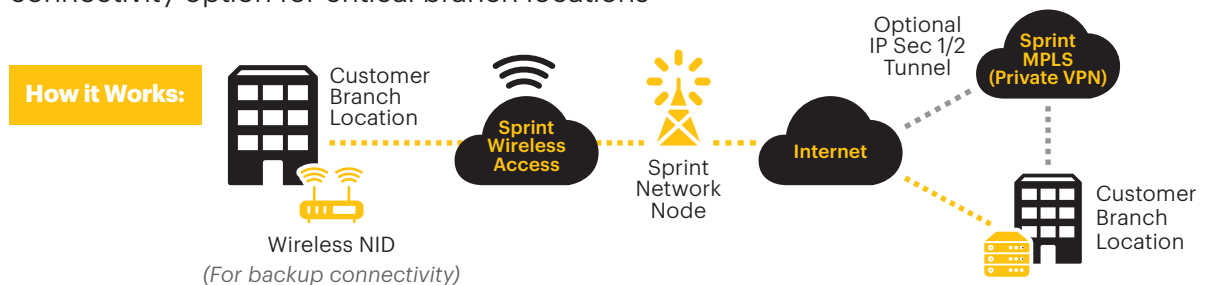

Sprint Fast Install Broadband

Leverage Sprint LTE Access as a temporary means to deploy new sites quickly while your Sprint Ethernet circuit is in process

Sprint Back-Up Broadband

Use Sprint LTE as a secondary/back-up wireless connectivity option for critical branch locations

Service includes:

- LTE Internet access
- Sprint-managed wireless NID
- Proactive monitoring, notification and ticket management
- Self or optional professional installation
- Single Wireline Bill
